

I am horrified at what Sinclair Broadcasting is doing with their anti-Kerry programming.

They are using the free public airwaves, and they are supposed to be using them for the public good.

However, they are betraying the trust put in them by the general public and using the public airwaves for their own political purposes.

They should have their license pulled.

This problem demonstrates that it is absolutely wrong to allow a single company to own so many stations. Let's go back to having a company own no more than seven stations. And while we're at it, let's bring back the fairness doctrine!
